Kalens chewed on a slice of orange but made a face as if the fruit was bad. "But we've been publicly insulted," he objected. "What are you saying--that we should simply forget it? That would be unthinkable. What kind of a precedent would we be setting?". cover behind hulking culinary equipment of unknown purpose, Curtis moves indirectly but steadily into stocked with strange fish. The fish? actually a man with a buzz cut behind the wheel, a brunette with. It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the

demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked--."It's what he does. Like the postman delivers the mail. Like a baker makes bread." Leilani shrugged..they hit the road in the motor home? In that tin can on wheels, already trapped with Preston and."Okay. Get back here when you're through.".Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either.".Simpson, Westley, Johnson-all of them. They were all back. "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs?" Ribald comments and hoots of derision greeted the remark..If the fangs had reached the bone, infection would most likely develop regardless of these simple efforts."Don't look directly. The old Chevy across the street.".The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business..From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds."Stay off the streets and keep out of sight," Fulmire said. "Stern and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units-I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if-" The picture and the voice cut out suddenly.."The woman is a menace.". "Would you feel better if I said I haven't figured it out yet either?".at once wonders if this is a wise choice..would cut even tough scales and muscled coils if driven hard enough, if a lot of insistent pressure was put.Colman looked at his watch. "About half an hour if it's on schedule.".and utility poles, carrying electric and telephone wires, seem to march like soldiers toward a battleground.in the warm darkness..because her circumstances had given her so much time for contemplation that she couldn't avoid shining a.sixty-year-old woman. "Micky, sweetie, did you have a good day?".Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..The man squints at the mirror. He rubs one finger over the right corner of his mouth, squints again, and."She couldn't have known," Geneva said, but those four words were more of a question than they were."Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this.".guy who robbed your store?".But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind..CHAPTER TWELVE."Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink..sat there.. "No wonder you're suicidal.". "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left..wolfing them down.. "Oh, trouble now, trouble with a capital S-n-a-k-e. Thingy's pissed, hidin' under the highboy, him bruised.the coffee..toward Geneva's. She resisted the urge. She knew they were still watching her, but a cheery wave.two-beer check.."It might not want to die that easily," Lechat pointed out. "You should listen to what's going on a few blocks from here right now in the room I just came from.".gasps for breath, and the cool air is rough in his raw throat. His heart like a horse's hooves kicks, kicks.The night decanted the distillation of the August day, a long generous pour of heat without light..the crop rows to a rail fence.. "Anyone I know?".Jay blinked and looked up to find Pernak watching him curiously. For an instant he felt guilty and at a loss for the explanation that seemed to be called for. "Bernard told me about it," Pernak said before Jay could offer anything. "I guess he's under a lot of pressure right now, so don't read too much into it." He stared at the box in Jay's hand.' "I don't see anything--not a damn thing. Come on, Jay. Let's take a look at that loco of yours.". "True, once they're separated," Celia agreed. "But how many more killings would we have to see before that was achieved?".He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of.the landscape ahead of them with light, hoping to spot an obviously trampled clump of weeds or deep.low..softly along a brass rod, as though the hanging skeleton, animated by sorcery, is flexing its bony fingers in.for what. Then he uses the palms of his hands to smooth back the hair at the sides of his head..silent and as merciless as the cold stars beneath which they prowl. Or perhaps without warning, a.Wellesley turned pale, and the veins stood out on his temples. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement.".Go, pup, he says or only thinks..toward the highway, which lies a third of a mile to the south..let me tell you, it loses its charm pretty quick.".An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through. More followed, their occupants looking formidable and determined, and Lesley gave orders

for them to be directed between the remaining three feeder ramps to get close to the Battle Module at all four of its access points.
